

WORLD BOUNDARY MAP

SEAMLESS COUNTRY BORDERS ACROSS THE GLOBE

A high level map view is the starting point of many location applications. TomTom has a suite of display products including World Boundary Map. Physical, political and geographical features are captured in World Boundary Map enabling a high-level view of the world.

World Boundary Map is built on top of our MultiNet® product and contains the following attributes:

- Country borders with names
- State borders for selected countries with names
- City centers
- Water elements with names
- Cartographic flags (classification of borders into inland or coastal)
- Elevation information (mountain height or sea depth)
- Disputed boundary elements and flags

World Boundary Map enhances mapping applications by creating a more visually compelling and realistic map display. It is easy to integrate and enables display enhancements.

PRODUCT FEATURES AND BENEFITS
