# Table of Contents

Esri resources for your organization

## Course introduction

- Course introduction
- Course goals
- Installing the course data
- Training Services account credentials
- Icons used in this workbook
- Understanding the ArcGIS platform

## 1 Introduction to editing

- Lesson introduction
- Editing in ArcGIS Pro
- Editing tasks
- Exercise 1: Investigate ArcGIS Pro editing tools
  - Start ArcGIS Pro and open a project
  - Explore the Create Features pane
  - Investigate modification tools
  - Discard edits
- What can you edit?
- Creating, modifying, and deleting features
- Lesson review

## 2 Preparing to edit GIS data

- Lesson introduction
- Exercise 2A: Investigate coordinate systems
  - Open an ArcGIS Pro project and identify map and layer spatial references
  - Measure the offset between layers
  - Change the map XY coordinate system and add a new layer
- Lining up data
- Managing attributes
- Exercise 2B: Enable editor tracking on a feature class
  - Open an ArcGIS Pro project and view the data attributes
  - Run the Enable Editor Tracking tool
  - Make an edit
- Layer symbology for editing
- App and project settings for editing
- Configuring ArcGIS Pro and your project for editing

Exercise 2C: Prepare a map for editing

- Open an ArcGIS Pro project and change the default measurement units

- Change the map's coordinate system

- Configure the layer attributes to make editing more efficient

- Set layer selectability and editability

Lesson review

Answers to Lesson 2 questions

### 3 Creating 2D features

Lesson introduction

Feature creation workflow

Feature templates

Group and preset templates

Choosing a construction tool

Managing feature templates

Exercise 3A: Create 2D features using feature templates

- Start ArcGIS Pro and zoom to a bookmark

- Investigate how symbology affects feature templates

- Use a feature template to create new geometry

- Create attributes for your new feature

- Create a preset template

- Create a new set of features using a preset template

Dynamic constraints

Snapping

Editing grid

Creating attributes

Exercise 3B: Filter the undo and redo stacks

- Open an ArcGIS Pro project and create new features

- Undo and redo actions

Exercise 3C: Use placement tools to create features

- Open an ArcGIS Pro project and zoom to a bookmark

- Prepare the editing environment

- Create new feature geometry

- Use snapping to create new polygons

- Use dynamic constraints and snapping to create a polygon

- Add attributes to new features

Lesson review

Answers to Lesson 3 questions

### 4 Modifying 2D features

Lesson introduction

Modifying GIS data

Feature modification workflow  
Modification tools  
Modifying geometry and attributes  
Exercise 4: Modify existing features  
    Open an ArcGIS Pro project  
    Relocate a point feature  
    Modify polygon shapes  
    Connect a multipart feature  
    Combine two features  
Lesson review  
Answers to Lesson 4 questions

## 5 Maintaining spatial integrity

Lesson introduction  
Using map topology  
Exercise 5A: Use map topology while editing  
    Create a map topology  
    Use a topology to modify coincident point and line features  
    Use the Align Edge tool to eliminate polygon overlaps  
    Use the Align Edge tool to remove gaps  
Geodatabase topology  
Comparing map and geodatabase topology  
Exercise 5B: Use geodatabase topology to maintain spatial integrity  
    Start ArcGIS Pro and investigate topology rules  
    Validate a topology  
    Use the Error Inspector to locate errors  
    Fix a topology error  
    Mark an error as an exception  
    Use editing tools to fix an error  
    Use a predefined fix to correct a data error  
    Correct topology errors  
    Revalidate a topology  
Lesson review  
Answers to Lesson 5 questions

## 6 Editing annotation

Lesson introduction  
Annotation  
Creating annotation  
Exercise 6A: Create annotation features  
    Create feature-linked annotation  
    Create a new annotation feature class

- Create standard annotation
- Modifying annotation
- Using the Attributes pane to modify annotation
- Exercise 6B: Modify existing annotation
  - Modify annotation position
  - Edit annotation text
  - Split annotation to two lines
  - Modify annotation rotation and position
  - Use vertices to modify annotation features
- Lesson review
- Answers to Lesson 6 questions

## 7 Creating and modifying 3D features

- Lesson introduction
- Points, lines, and polygons in 3D
- Placement tools in 3D
- Exercise 7A: Create polygon features in a 3D scene
  - Start ArcGIS Pro and check the vertical coordinate system
  - Add a cartographic offset
  - Create a new polygon feature
  - Use snapping to create a coincident polygon
  - Extrude z-aware polygons
  - Create a point feature and symbolize it in 3D
- Multipatch data in ArcGIS Pro
- Creating multipatch data in ArcGIS Pro
- Exercise 7B: Create a new multipatch feature
  - Prepare the ArcGIS Pro scene
  - Sketch a new multipatch feature
- Duplicating features vertically
- Modifying 3D data in ArcGIS Pro
- Exercise 7C: Modify multipatch data in ArcGIS Pro
  - Rotate a 3D feature
  - Add a new face to an existing multipatch feature
  - Extrude a multipatch face
  - Create new faces using interactive guides
- Lesson review
- Answers to Lesson 7 questions

## Appendices

- Appendix A: Esri data license agreement
- Appendix B: Answers to lesson review questions
- Appendix C: Additional resources
