## Course introduction

Introduction .....	i
Course goals .....	i
Additional resources .....	i
Icons used in this workbook .....	ii
Understanding the ArcGIS Platform .....	iii

## 1 Introduction

Lesson introduction .....	1-1
The geographic approach .....	1-4
Scenario-based approach .....	1-6
Lesson review .....	1-8

## 2 Data preparation for operational planning

Lesson introduction .....	2-1
Scenario .....	2-4
Geographic approach .....	2-6
What is geographic data? .....	2-8
Defining the geodatabase .....	2-10
Exercise 2A: Start ArcMap and set up a connection to the data .....	2-13
Open the Catalog window .....	2-14
Make a folder connection .....	2-14
Expand and view the folder connection .....	2-15
Geodatabase elements .....	2-16
Working with geographic data .....	2-17
How would you represent this dataset? .....	2-21
Identify the data type .....	2-23
Understanding metadata .....	2-25
Exercise 2B: View an item description (metadata) .....	2-27
View feature class metadata .....	2-28
Preview a feature class .....	2-29
Examine feature class metadata .....	2-30
Feature classes .....	2-31
Feature datasets .....	2-32
Exercise 2C: Explore and modify feature class properties .....	2-35
Preview feature class data .....	2-36
Remove an attribute field .....	2-36
Change a feature class alias .....	2-37
Exercise 2D: Preview data outside a geodatabase .....	2-39
Preview a shapefile .....	2-40
Examine the data source of a map document .....	2-40
Data loading methods .....	2-42
Exercise 2E: Manage files .....	2-43
Rename a feature class .....	2-44

Copy a feature class between geodatabases .....	2-44
Import shapefiles into a geodatabase.....	2-44
Create a new feature dataset.....	2-46
Challenge: Import a feature class into a feature dataset.....	2-47
Lesson review .....	2-48

### 3 Data and layer properties

Lesson introduction .....	3-1
Scenario .....	3-3
Geographic approach.....	3-5
Data and layers .....	3-7
Exercise 3A: Perform a project repair.....	3-9
Update a single layer path.....	3-11
Repair multiple data sources .....	3-12
Set the default geodatabase .....	3-13
Attributes, symbology, and visualization .....	3-14
Exercise 3B: Change symbology .....	3-17
Change the color of a feature .....	3-18
Change the appearance of a polygon feature.....	3-18
Change the appearance of a point feature .....	3-19
Exercise 3C: Add layers to ArcMap .....	3-21
Add a layer using the Standard toolbar.....	3-22
Add a layer from the Catalog window.....	3-22
Add a raster .....	3-23
Reorder layers.....	3-23
Selecting features of interest .....	3-26
Exercise 3D: Make selections on features and records.....	3-27
Select features .....	3-28
Add features to a selection.....	3-29
Sort attributes of selected features .....	3-31
Select features based on attributes .....	3-31
Getting information using layer properties .....	3-33
Exercise 3E: Working with layer properties .....	3-35
Examine layer properties.....	3-36
Change symbology based on attributes.....	3-37
Exercise 3F: Apply labels and set scale dependency .....	3-39
Label features on a map .....	3-40
Use properties to label features at a certain scale .....	3-41
Use properties to draw features at a certain scale .....	3-42
Asking questions and getting answers .....	3-43
Exercise 3G: Limit data in the display.....	3-45
Open the Query Builder .....	3-46
Build a limiting expression.....	3-47
Limit your display data .....	3-49
Challenge: Show only the opposing force to Sherman's advance .....	3-50

Lesson review .....	3-51
---------------------	------

## 4 Spatial reference

Lesson introduction .....	4-1
Scenario .....	4-3
Geographic approach .....	4-5
Shape of the earth .....	4-7
Datums .....	4-9
Two types of coordinate systems .....	4-11
Exercise 4A: Set the data frame coordinate system .....	4-15
Start ArcMap .....	4-16
Define a coordinate system .....	4-16
Map projections .....	4-17
Map projection spatial properties .....	4-19
Game of distortions .....	4-22
Exercise 4B: Define the projection of a dataset .....	4-25
View raster dataset properties .....	4-26
Define projection .....	4-26
UTM and MGRS coordinate systems .....	4-28
Exercise 4C: Create point features on a map .....	4-29
Add a point graphic at specific coordinates .....	4-30
Select elements .....	4-30
Convert point graphic to feature .....	4-30
Change point symbology .....	4-32
Exercise 4D: Create line features on a map .....	4-33
Create a route using line graphics .....	4-34
Select elements .....	4-34
Convert line graphic to feature .....	4-35
Exercise 4E: Create points from a feature's vertices .....	4-37
Add vertices to a line .....	4-38
Convert feature vertices to points .....	4-38
Export feature class coordinates to a comma-delimited ASCII text file .....	4-39
Lesson review .....	4-43

## 5 Raster fundamentals

Lesson introduction .....	5-1
Scenario .....	5-3
The geographic approach .....	5-5
Raster sources and uses .....	5-7
Raster resolutions .....	5-9
What is a mosaic dataset? .....	5-13
Exercise 5A: Create a mosaic dataset .....	5-15
Create an empty mosaic dataset .....	5-16
Add rasters to a mosaic dataset .....	5-17

Defining a stretch type .....	5-19
Exercise 5B: Change the image stretch type .....	5-23
Add existing features.....	5-24
Change the mosaic stretch type.....	5-24
Orthorectification.....	5-26
Pan sharpening .....	5-29
Exercise 5C: Create a pan-sharpened orthorectified mosaic.....	5-31
Create an empty mosaic dataset with a product defined .....	5-32
Add rasters to a mosaic dataset.....	5-32
Apply raster type properties .....	5-34
Orthorectification vs. non-orthorectification .....	5-36
Lesson review .....	5-37

## 6 Working with vectors

Lesson introduction .....	6-1
Scenario .....	6-3
The geographic approach.....	6-5
Vector data and feature classes .....	6-7
How is vector data collected? .....	6-8
Evaluating vector data.....	6-9
Considerations when choosing vector data .....	6-10
Exercise 6A: Set the default geodatabase.....	6-13
Create a new geodatabase .....	6-14
Set the default geodatabase .....	6-14
Import a shapefile .....	6-14
Considerations when creating vector data.....	6-16
Creating vector data .....	6-19
Exercise 6B: Create a new feature class .....	6-21
Set up the baseline foundation data .....	6-22
Create a new feature class.....	6-25
Cartographic license.....	6-27
Collection pitfalls .....	6-29
Exercise 6C: Add new polygon features (feature extraction).....	6-33
Focus your display on an area of interest .....	6-34
Add new polygon features.....	6-35
Update new polygon feature attributes.....	6-38
Add additional polygon features.....	6-39
Exercise 6D: Add new point features (feature extraction) .....	6-41
Create a new feature class.....	6-42
Add new point features.....	6-42
Lesson review .....	6-45

## 7 Introduction to spatial analysis

Lesson introduction .....	7-1
Scenario .....	7-3
The geographic approach .....	7-5
What is spatial analysis? .....	7-7
Spatial analysis examples .....	7-9
Buffer (analysis) .....	7-11
Exercise 7A: Conduct buffer analysis .....	7-13
Open ArcMap and set up the map document .....	7-14
Conduct buffer analysis .....	7-15
Digital elevation models .....	7-17
Exercise 7B: Load and symbolize elevation data .....	7-21
Load elevation data .....	7-22
Use the Image Analysis window to clip .....	7-22
Project the dataset .....	7-24
Symbolize elevation data .....	7-25
Visibility analysis .....	7-27
The Visibility tool .....	7-28
Exercise 7C: Conduct visibility analysis .....	7-33
Run the Visibility tool .....	7-34
Change the symbology of the visibility layer .....	7-35
Analyze the attribute table and resymbolize .....	7-36
Clip using the data frame properties .....	7-37
Add a point to a feature class .....	7-39
Rasters with functions .....	7-42
Hillshade .....	7-43
Exercise 7D: Create a hillshade .....	7-47
Create a buffer .....	7-48
Clip the raster using the Image Analysis window .....	7-49
Create a hillshade using functions .....	7-49
Lesson review .....	7-52

## 8 Map production

Lesson introduction .....	8-1
Scenario .....	8-3
The geographic approach .....	8-5
Products for dissemination .....	8-6
Creating a map .....	8-7
Exercise 8A: Create a map layout .....	8-9
Change the layout view .....	8-11
Apply a map template .....	8-12
Insert a new data frame .....	8-12
Modify the map layout .....	8-14

Common map elements.....	8-17
Exercise 8B: Add common map elements.....	8-19
Add an MGRS grid.....	8-20
Add a north arrow.....	8-22
Add a scale bar.....	8-22
Add a legend.....	8-24
Add map annotations.....	8-26
Add classification markings and explanatory text.....	8-27
Add a grid reference box.....	8-29
Add an extent indicator.....	8-33
GEOINT disseminated.....	8-34
Exercise 8C: Export a final product.....	8-35
Export the map.....	8-36
Export layers to KML.....	8-37
Lesson review.....	8-39

## Appendixes

Appendix A: Esri data license agreement.....	A-1
Appendix B: Job aids.....	B-1
Appendix C: Answers to lesson review questions	
Lesson 1: Introduction.....	C-1
Lesson 2: Data preparation for operational planning.....	C-2
Lesson 3: Data and layer properties.....	C-3
Lesson 4: Spatial reference.....	C-4
Lesson 5: Raster fundamentals.....	C-5
Lesson 6: Working with vectors.....	C-6
Lesson 7: Introduction to spatial analysis.....	C-7
Lesson 8: Map production.....	C-8
